PROCEEDINGS  
OF THE INTERNATIONAL GEOTECHNICAL CONFERENCE

**DEVELOPMENT OF URBAN AREAS  
AND GEOTECHNICAL ENGINEERING**

Saint Petersburg, 16-19 June 2008

**Volume 2**

Edited by Prof. V.M. Ulitsky

Saint Petersburg  
2008

## Table of contents

### Volume 2

#### **Session 2. Soil characterization for geotechnical and geoenvironmental purposes in urban areas as a basis for geotechnical design**

<i>S. Bozilovic, M.S.Jelena Bozilovic-Ristoska</i> Project Management, Civil Engineering Influence on Geological Environment .....	365
<i>A. Chinkulkijniwat, E. Maankooksung</i> Influence of gravel content and compaction mold size on compaction characteristics of cohesionless soil.....	371
<i>B.L. Chu, Y.W. Jou, M.C. Weng</i> Influence of fine soil properties on deformation characteristics of gravelly soil.....	377
<i>S. Horpibulsuk, W. Katkan</i> Compressibility of Structured Bangkok Clay .....	383
<i>J. Jiang, G.B. Liu</i> Test Study on Small Strain Characters of Shanghai Soft Clay .....	389
<i>V. N. Kaliakin</i> Assessment of Model Predictive Capabilities for True Triaxial Shearing of Clay.....	397
<i>H. A. Kasani, A. Eslami</i> Multivariate models for predicting compression index of Rasht clay in Iran.....	403
<i>B. Kavur, I. Vrkljan, D. Milakovic, N.S. Cvitanovic</i> A case history on the interpretation of CPTU data using laboratory test results .....	409
<i>M.K. Kumor, L.A. Kumor</i> The shrinkage and swelling of Northern Poland's expansive clays.....	413
<i>Lech M., Bajda M., Garbulewski K.</i> Seismic and electrical resistivity cone penetration tests of Warsaw clays .....	419

<i>Ž. Mlinar; Ž. Miklin &amp; D. Jamičić</i> Characteristics and genesis of landslides of the urbanized zone of the Mt. Medvednica.....	425
<i>E. Niederleithinger, A. Taffe</i> Non-destructive methods for foundation evaluation before re-use .....	431
<i>P. Punrattanasin</i> The contaminated sorption in Khon Kaen loess soil using batch equilibrium test.....	437
<i>A. Rotaru</i> Swelling-shrinking phenomena recorded on Bahlui clay, Iasi County, Romania.....	443
<i>C. de Santiago, M. Santana, J. Manzanar</i> Digital Image processing and Fourier descriptors analysis of the porosity in various volcanic rocks.....	449
<i>A. Sezer, S. Altun, A.B. Goktepe</i> Microzonation of Liquefaction Susceptibility in Northern Izmir.....	455
<i>B.J. Shih, M.J. Chuang, W.S. Li</i> The Analysis of Landslides at Chao-Zhou-Hu area at Chiayi, Taiwan.....	461
<i>J. Suebsuk, S. Horpibulsuk, M.D. Liu</i> A new hardening equation for naturally structured clays during subyielding.....	467
<i>A. Szymanski, W. Sas, A. Niesiolowska, E. Malinowska</i> The factors which determine the soft subsoil deformations .....	473
<i>K. Thooft</i> Isis.cpt – Automatic interpretation of CPT-results .....	479
<i>Z. Veinovic, B. Kovacevic Zelic, P. Kvasnicka, D. Domitrovic</i> Assessment of liquefaction potential of the Sava river plain near Zagreb.....	485

### **Session 3. Geotechnical aspects of reconstruction of historical cities and monuments preservation**

<i>R.A. Abbas, H.M. Al.Khuzai, N. Tariq</i> Reconstruction of two stories brick masonry building.....	493
<i>A. Chirica</i> The damages and the remedial measurements for some old buildings due to a deep excavation in Bucharest downtown.....	499

<i>R. Damian</i> Constructive solutions for the locations from the costal areas and the reinforcement of the costal areas by building up .....	509
<i>N. Hataf</i> The geotechnical aspects of construction and development in Shirazcity center, Iran.....	515
<i>N.M. Ilies</i> Dampness phenomenon on historical buildings. Draining off and rehabilitation interventions for historical buildings .....	521
<i>A.Z Khasanov, Z.A. Khasanov</i> Reinforcing of the footing, the foundations of the mosque Tilla-Kori ensemble Registan in Samarkand city.....	527
<i>Ervin Paci</i> The construction aspects of a multistory building above a medieval wall in Vlora city Albania.....	535
<i>J.H. Shin</i> Geotechnical consideration in urban waterfront restoration a case study: Cheonggye-Cheon restoration project .....	539
<b>Session 4. Geotechnical challenges in high-rise and underground construction</b>	
<i>M.M. Berilgen, C. Akgüner, S. Yıldırım</i> Performance of a modified support system for a deep excavation – a case study .....	547
<i>L.A. Dimov, E.M. Bogushevskaya</i> Analysis of movements of underground structures from horizontal load.....	553
<i>H. Hotta, K. Nakanishi, Y. Katsura</i> Evaluation of stress-strain relations of ground derived from in situ monitoring during a large-scale inverted construction of super-high-rise building .....	557
<i>Q.F. Hu, H.W. Huang</i> Risk assessment on face stability of large-diameter Yangtze river tunnel in Shanghai, China .....	565
<i>D.F. Laefer, B. Conry, D. Murphy, S. Ceribasi</i> A new multi-parallel condition assessment scale for estimating tunnel-induced damage.....	571
<i>Z.G. Liu, D. M. Zhang, H. W. Huang</i> Analysis on influence of large diameter shallow shield tunneling in close space .....	577

<i>S. Łukasik, M. Świeca</i> Problems with deep foundation in the vicinity of old buildings in urban areas in difficult geotechnical conditions .....	583
<i>M.A. Matos Fernandes, C.D. Pereira, N.M.C. Guerra</i> Search for null displacement of walls supporting deep excavations in soft clay – a numerical experiment on a real case .....	587
<i>M. Vaziri, T. Hartlib</i> Predicted tunnel displacement below a deep excavation in London using finite element methods .....	593
<i>W.F. Lee, C.H. Chen, S.S. Lin, K. Ishihara</i> Applications of 3d resistivity imagine profiling method on detecting defects and repairing performance of diaphragm walls for deep excavation .....	603

### **Session 5. Application of state-of-the-art geotechnologies in congested urban areas. Use of monitoring and the observational method**

<i>G. Anagnostou</i> Some remarks concerning EPB and slurry shields .....	611
<i>G.P. Boutwell, M.S. Nataraj, R. Satyamurthy</i> Environmentally protective foundation piles for contaminated urban and industrial sites .....	615
<i>C.-M. Chan</i> Compressibility study of cement-stabilised clay using the electrical resistivity method .....	621
<i>C.-Yu Ou, S.-Chi Chien, P.-Go Hsieh</i> Soil Improvement using electroosmosis with injection of chemical solutions in urban underground construction .....	625
<i>W. Gasaluck, P. Punrattanasin, S. Hougjing</i> The capacity of improved loess by emulsified asphalt as a highway base coarse.....	633
<i>Y.-S. Fang, D.H. Ju, M.-T. Chien</i> Rate of ground settlement due to shield tunneling .....	639

### **Session 6. Geotechnical challenges in megacities and new capitals**

<i>J.W.J. Rojas, K.S. Heineck, N.C. Consoli</i> Encapsulation of a soil contaminated by heavy metals .....	647
<i>N. Satyam, K.S. Rao</i> Seismic site characterization of Delhi region using MASW tests .....	653
