

TABLE OF CONTENTS

1. Application of effective algorithms for solution of large sets of algebraic equations in soil-structure-interaction problems	7
2. Structure of <i>FEM models</i> software used for soil-structure interaction analysis	10
3. Methodology of soil-structure problems solution	13
4. Soil-structure interaction calculations examples	15
4.1. Comparing calculations results with monitoring data.....	15
4.2. Regularities of slab foundations behaviour.....	19
4.3. Regularities of piled foundations behaviour with account of structure stiffness	26
4.4. Analysis of complex situations in reconstruction	33
